FOR IMMEDIATE RELEASE:

THE MISSNER GROUP COMPLETES RENOVATIONS FOR ILLINOIS BONE & JOINT IN MORTON GROVE

(Des Plaines, Illinois) – The Missner Group is pleased to announce that the firm has completed renovations for Illinois Bone & Joint Institute’s (IBJI) Morton Grove, Illinois location at 9000 Waukegan Road.

The Missner Group completed the 24,000 square foot build-out on the facility’s second floor, which included the additions of a new x-ray room, procedure room as well as relocating the IV suite. The remodel also included adding new medical office space and the installation of new carpet and paint throughout.

The Missner Group completed a previous project at this Illinois Bone & Joint Institute’s location last spring. This earlier work included the demolition of an existing MRI suite and the installment of new state-of-the-art MRI equipment. In addition, The Missner Group deconstructed an indoor swimming pool, filled it with structural stone and topped it with flooring to create an open physical and occupation physical training space.

“We have had the privilege to work with IBJI on numerous projects, at multiple locations, over the years,” said Heath Yarger, project manager for The Missner Group, “and we are pleased to have completed yet another successful renovation for them. We highly value our clients, and take pride in those we have had the honor to work with on a repeat basis.”

Yarger was the project manager and Angelo Christopher was the project superintendent for The Missner Group. Gensburg Architects provided the architectural services.

A leader in orthopedic care in the Chicago metropolitan area with more than 20 locations, IBJI specializes in the diagnosis, treatment and management of injuries and diseases of the musculoskeletal system. The Missner Group has completed numerous projects for IBJI including locations in Chicago, Lincolnwood, Wilmette, Glenview, and Des Plaines, Illinois.
