FOR IMMEDIATE RELEASE:

THE MISSNER GROUP COMPLETES A MAJOR OFFICE RENOVATION IN SKOKIE

(Des Plaines, Illinois) – The Missner Group is pleased to announce that the firm has completed a 38,000 square foot headquarter renovation on behalf of Generation Brands at 7400 Linder Avenue in Skokie, Illinois. The two-phase project included 19,000 square feet of office renovations and the build-out of a 19,000 square foot showroom.

“We are pleased to have completed this project on behalf of our client,” said Bob Nomellini, COO for The Missner Group. “This was a terrific collaboration between The Missner Group’s construction team and Generation Brands. For the past two years, we worked in close communication in order to deliver a space that met the company’s unique needs, and that will also help them to continue the growth and success of the organization.”

Generation Brands is a leading lighting and ceiling fan company that serves the electrical wholesale, home improvement, home décor and building industries. The Missner Group was selected by Generation Brands to complete the extensive two-year remodel to the company’s headquarters. Completed during phase I, construction of the office space included the build-out of private offices, conferencing facilities, a corporate training room, a kitchen area, and a modernized employee lounge area.

Completed this month, the dramatic showroom features lighting and fan fixtures, high-tech displays and modern finishes. The showroom includes metal framing throughout, as well as ceilings and floors that complement the lighting and light channel detailing. The Missner Group also constructed drywall suspended clouds from which to attach the numerous displays, as well as incorporated motion-censored lighting throughout the space including in the high-end lighting fixtures.

The Missner Group’s Kent Nepras was the project manager and Scott Nomellini served as the project superintendent. Dearborn Architects provided the architectural services.
