

Peacock *we engineer trust*

April 1, 2014

Barry Missner - President
The Missner Group
5520 West Touhy Avenue
Skokie, IL 60077

Dear Barry,

I would like to thank your team for their professionalism on our recent 532,000 square foot design-build improvement project in Romeoville, Illinois. I would also like to thank you for your personal involvement throughout the project. Converting an industrial/warehouse building into a complex frozen/refrigerated food packaging and manufacturing facility requires a certain level of expertise which The Missner Group demonstrated from beginning to end.

A project of this nature is no small feat, particularly when an expedited schedule is required. We selected your firm for its understanding of the construction challenges associated with a USDA food-grade facility; and are pleased with our choice. The resulting facility demonstrates the experience and high-quality craftsmanship of your team and well-positions us within our marketplace.

It has been a pleasure working with The Missner Group. As a result of this project, we regard your firm with a high level of trust. Your work speaks for itself. I would also like to personally commend both you and your project manager, Drue Stoehr. Your consistent communication with us throughout the process and Drue's ability to coordinate all the moving parts associated with a project of this magnitude were instrumental in the resulting success.

We would highly recommend The Missner Group for design-build construction projects. We appreciate your commitment to our organization and look forward to working with you again in the future.

Sincerely,

Jim Olejarski - Director of Engineering
